## Our Brand Story

# Esker

naturals

At Esker we have set out to always source the best and most ethical natural products.

In early 2010 we decided to take some land on the foothills of the Rhodopes Mountain in Bulgaria, and started a plantation with rosehips, lavender and other herbs. The intention is to use natural farming methods to deliver a range of our own clean natural products.

We use low-intensity farming which has a lower impact on the environment compared to more resource-intensive forms of production. We are keen on maintaining biodiversity and re-energising rural societies in remote regions.
